Restriction is required as follows:

In the first 6 Groups the corresponding compositions and methods are included.

- I. Compounds where W is OR and Z is heterocyclyl.
- II. Compounds where W is OR and X is the non-hetero value.
- III. Compounds where W is R₉ and Z is heterocyclyl.
- IV. Compounds where W is R₉ and Z is the non-hetero value.
- V. Compounds where W is the other values and Z is heterocyclyl.
- VI. Compounds where W is the other values and Z is the non-hetero

value.

VII. Methods of treatment using compounds excluded from the material in Group I, by the provisos of claim 1.

The instant restriction requirement is proper because of the vastness of scope and distinctness of the compounds in generic claims 1, 23 and 27. The provisos add to the evidence of distinctness. The search is rendered tortuous and encyclopedic by the variety of the values of the variables appended to the 2-phenyl moiety.

In case no generic claim is found allowable election of an ultimate species is now required.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
